

Forever Royal Jelly®

#036

Forever Royal Jelly®

The only nutrition worthy of the queen bee.

What's the secret to the longevity of the queen bee? It's her royal diet. Now you can supplement your nutrition with the same food that fuels the queen: royal jelly. She lives years longer than the rest of the hive the only substance she eats during her reign atop the colony is royal jelly. When worker bees decide to make a new queen, they feed her larvae large amounts to kickstart her morphing into royalty.

Royal jelly is a nourishing fuel that contains 10-HDA, also known as queen bee acid. It's a fatty acid found in royal jelly that's believed to be the source of many of its benefits.

It also contains natural proteins, fatty acids, mineral salts, amino acids and vitamins to support health and wellness as well as being a natural source of energy.

Forever Royal Jelly® is easily absorbed and readily digestible. Try taking it together with Forever Bee Pollen® and Forever Bee Propolis® for the best of nutrition straight from the hive!

BEE
