

Forever Lean®

#289

Forever Lean®

Your pre-meal calorie shield.

Do you wish there was more you could do to help with weight management at every meal? Forever Lean® delivers two powerful ingredients that work together to help reduce the body's absorption of calories without making you feel wired or jittery.

The first is a fat-absorbing fiber that we extracted from the Indian fig plant. This unique fiber has a high ability to bind to fats. We've paired this with a protein derived from the white kidney bean. This protein works by slowing the body's absorption of sugar in the small intestine by temporarily inhibiting the enzyme activity that converts starches to sugar.

Combined, these ingredients can help you reach your ideal weight by helping block the absorption of some of the fat and carbohydrate calories you ingest. But it gets better, chromium is an important trace mineral that helps the body regulate blood sugar and support a normal metabolism.

We've packed these dynamic ingredients into a weight management supplement free of caffeine or stimulants. If you're sensitive to caffeine or simply try to limit your daily intake, Forever Lean® is a perfect solution to help you meet your weight management goals.

To get the most out of this supplement, take it with a full glass of water before meals or snacks. It's also important to incorporate a healthy diet and regular exercise into your overall weight control regimen to achieve and maintain your weight goal.
